

ScienCell produkcija

APRAKSTS

ScienCell Research Laboratories ([ScienCell](#)) ir biotehnoloģijas kompānija, kuras misija ir šūnu un ar šūnām saistītu produktu pētniecība un attīstība, eksperimentālai un terapeitiskai lietošanai. ScienCell tehnoloģija nodrošina daudzas augstas kvalitātes normālas cilvēku un dzīvnieku šūnas, šūnu barotnes un reaģentus, barotņu bagātinātājus, šūnu atvasinātus RNS, kDNS un proteīnus zinātnei.

Biosan ir oficiālais izplatītājs Baltijas teritorijā - Latvija, Lietuva un Igaunija, kā arī mēs varam izplatīt citās valstīs, kurās ScienCell patlaban nav oficiāla pārstāvja.

Human and Animal Primary Cells

We offer 24 normal human cell systems with over 140 different cell types. We also provide normal animal cells as well as cell-derived cDNA, RNA, and proteins.

Cell Culture Media

We have developed various media to help you with the specific needs of different cell types. By using ScienCell media, you are assured of a consistent, quality environment for your studies.

Human Pluripotent Stem Cells

We are pleased to introduce a new line of products specially designed for human pluripotent stem cells, including human embryonic stem cells and mesenchymal stem cells.

Reagent

Reagents

We have developed various reagents to help you with the specific needs of different cell types. By using our reagents, you are assured of a consistent, quality environment for your studies.

Molecular Biology

Molecular biology is the study of molecular process of replication, transcription and translation of the genetic material. Much of the work in molecular biology is quantitative, and recently much work has been done at the interface of molecular biology and computer science in bioinformatics.

Services

Services

Our goal is to help you with your efforts by providing custom services upon request. ScienCell caters to any special needs in cell type, quantity, isolation and preparation methods.
